Course Introduction:

The "**C Programming Basics**" course teaches the students about essentials of being a successful By studying this, students may learn the skills of Problem Solving Become technology-oriented with the knowledge and ability to develop creative solutions, and better understand the effects of future developments of computer systems and technology on people and society as a whole. Acquire some development experience within a specific field of Computer Science, through project work. Gain ability to apply knowledge of Computer Science to the real-world issues. Build up programming, analytical and logical thinking abilities.

Title of the course: "C Programming Basics"

Course code: COMCABC

Minimum Eligibility Criteria : Pursuing degree and Basic Knowledge of Computer

Duration of the Course: 30 Hours

Intake: 80 students

Medium of Instruction and Examination: English

Pattern of Examination: MCQ paper for 50 marks.

Certificate eligibility rules: Who secures minimum marks of 18 out of 50, those all are eligible to have the Certificate.

Objectives of the Certificate Course

- The course is designed to provide complete knowledge of C language.
- Students will be able to develop logics which will help them to create programs, applications in C.
- Also by learning the basic programming constructs they can easily switch over to any other language in future.
- After the completion of this course, the students will be able to develop applications.

CERTIFICATE COURSE on "C PROGRAMMING BASICS"

PURPOSE OF INTRODUCTION

Colleges teach C programming languages because it's the most basic programming language and quite competitive. You have to literally write lines of codes to solve a simple problem. Whereas, if you compare C with Java, Java has many inbuilt functions like

As a beginner, competitive coding in C is a challenge where you will have certain time limit & space limit. What's best than solving a challenge? Hence, I would always say people to get started with C programming language, solve easy to medium problems. and then move to advanced programming courses.

I would recommend that the college should teach C Basics as an introductory course but they should move with Programming.

- To provide the students with an overview of Programming.
- To enable students to solve the real world problems.
- To acquaint the students with the knowledge of Problem solving techniques.
- To enable the students to become Programmer.
- To enable the students gain the knowledge about application software and System Software.
